ABOUT

AI creator and video editor with 18 years of experience in film, television and digital. I have edited TV shows for the Pyatnitsa! channel, promos, showreels and YouTube content, and I am responsible for sync, sound and preparing on-air masters. Six years in an international team at Viacom, including compliance editing together with the legal department. Since October 2025 I have been working on an AI project under NDA, using generative tools in post-production.

Strengths: attention to detail, multitasking, responsibility, teamwork, fast learning.

AI IN EDITING

- **Text-based editing and transcription:** fast search for the right moments in large volumes of footage, subtitles.
- **Audio:** noise reduction, voice isolation, speech enhancement on difficult material.
- **Video restoration:** upscaling, denoising, work with archival and low-quality footage.
- **Generation for promos:** AI video and images (Kling, Seedance, Higgsfield, Krea): references, storyboards, short clips and design elements; voiceover for rough cuts.
- **LLMs in the workflow:** draft titles and descriptions for YouTube, transcript analysis, edit logs.

EXPERIENCE

AI Creator, Video Editor
Oct 2025 — present

AI project (under NDA)

- Work on an AI project under NDA; details are confidential.
- Editing and post-production of material created with generative models (Kling, Seedance, Higgsfield, Krea).
